INTERNAL RISK FACTORS

BUSINESS RELATED RISK

Operating in the dynamic and rapidly evolving AI industry involves several risk factors that Kairosoft AI Solutions Ltd. diligently manages to ensure sustainable growth and stability. These include:

1. Technological Advancements:

The AI industry is characterized by rapid technological changes, and staying updated is essential. Failing to adapt to new developments or innovate could lead to obsolescence, making it vital for us to continually invest in R&D.

2. Data Privacy and Security:

Handling sensitive data comes with the risk of data breaches and cybersecurity threats. We are committed to implementing robust data protection measures and complying with international privacy regulations to mitigate these risks.

3. Regulatory Compliance:

As governments worldwide introduce stricter regulations around AI and data use, non-compliance could lead to legal penalties and damage to reputation. We actively monitor regulatory changes and ensure our solutions adhere to all applicable standards.

4. Market Competition:

Intense competition from both established companies and new entrants could impact our market share. We address this by focusing on innovation, customer-centric solutions, and strategic partnerships to maintain competitive edge.

5. Talent Acquisition and Retention:

The success of our business relies on the expertise of skilled professionals. Difficulty in attracting or retaining top talent could hinder our ability to innovate and deliver quality solutions. We prioritize creating a supportive and growth-oriented work environment to attract and keep the best talent.

**6. Operational and Financial Risks:**

Fluctuations in the market, economic conditions, and client demand can pose operational and financial challenges. Effective financial management, strategic planning, and diversification of our client base help mitigate these risks.

7. We do not own any of the properties from which we operate. If we are unable to renew our current leases or if we renew them on terms which are detrimental to our Company, we may suffer a disruption in our operations or increased relocating costs, or both, which could adversely affect our business, results of operations, cash flows and financial condition

We lease/license properties for our operations, comprising our Registered Office. There is no guarantee that these leases/licences will be renewed or extended once their term is Complete. If we are unable to renew or extend our current leases/licenses, or if we renew or extend them on terms which are detrimental to us, we may suffer a disruption in our operations or increased relocating costs, or both, which could adversely affect our business, results of operations, cash flows and financial condition.

8. Failure to continue investing in Research and Development (R&D) activity may harm our business growth.

Our company is engaged in the business of providing various kinds of Artificial Intelligence to multiple business in India. With the rapid changes happening in the IT industry due to introduction of new technologies, softwares, hardwares or change in the government policies or regulations etc., it is essential for us to continue to invest in the research and development of our services to be aligned with the changing industry trends.

Considering the importance of R&D activities in our operations and business, we have been continuously investing in R&D and related activities. This requires an extensive amount of capital and human effort in addition to other resources. Although our company has not faced any issues till date, however, we cannot assure the potential investors that we shall be able to invest continuously or at all in R&D activities in coming years as we are presently doing. This may have an adverse effect on our growth and impact our business adversely.

9. Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.

We provide AI based Marketing Solution, AI Business Model Innovation and AI Content Writing Services to business across India. Our business is dependent upon increasingly complex and interdependent IT system. The size, complexity and external location of our computer systems make them potentially vulnerable to breakdowns. Many of our services involves handling of confidential information and any breach of this information due to any cyber-security attacks including viruses, ransom ware and spam attacks. Our insurance coverage may not be adequate to cover all the costs related to cyber-security attacks or disruptions resulting from such events. Further, our financial, accounting, or other data processing systems may fail to operate adequately, or at all, because of events that are beyond our control, including a disruption of electrical or communications services in the markets in which we operate. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis.

10. Our success depends substantially on the continuing services of our promoters, senior executives and other key highly skilled IT personnel.

Our future success heavily depends upon the continued services of our promoters, senior IT executives and other key employees. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit, train and retain experienced, talented and skilled professionals. A significant increase in the attrition rate among skilled IT professionals with specialized skills could decrease our operating efficiency and productivity and could lead to a decline in demand for our services. If one or more of our senior IT executives or key employees are unable or unwilling to continue in their present positions, it could disrupt our business operations which could materially adversely affect our business, financial condition and results of operations, and we may not be able to replace them easily or at all. If any of our senior IT executives or key personnel joins a competitor or forms a competing company, we may lose customers, suppliers, know-how and key IT professionals and staff members to them which may materially and adversely affect our business, financial condition and results of operations.

RISKS RELATING TO RIGHTS ISSUE

1. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of Investor's shareholding.

The Rights Entitlements that are not exercised prior to the end of the Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted pursuant to increase in paid up share capital. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Rights Issue. Renounces may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the Demat Account of the Renounces prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounce will not be able to apply in this Rights Issue with respect to such Rights Entitlements.

2. You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

3. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

4. The Issue Price of our Right Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price.

There can be no assurance that the Investors will be able to sell their Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- (a) quarterly variations in the rate of growth of our financial indicators such as earnings per share;
- (b) changes in revenue or earnings estimates or publication of research reports by analysts;
- (c) speculation in the press or investment community;
- (d) general market conditions; and
- (e) domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

1. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our business.

There could be a downgrade of India's sovereign debt rating due to various factors, including changes in tax or fiscal policy, or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available.

Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India, which may cause fluctuations in the prices of our Equity Shares. This could have an adverse effect on our business and financial performance, and ability to obtain financing for expenditures.

2. Investing in securities that carry emerging market risks can be affected generally by volatility in the emerging markets.

The markets for securities bearing emerging market risks, such as risks relating to India, are, to varying degrees, influenced by economic and securities market conditions in other emerging market countries. Although economic conditions differ in each country, investors' reactions to developments in one country may affect securities of issuers in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general.

Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India, which could adversely affect the Indian financial sector in particular. Any such disruption could have an adverse effect on our Company's business, future financial performance, financial condition and results of operations, and affect the price of the Equity Shares. Accordingly, the price and liquidity of the Equity Shares may be subject to significant fluctuations, which may not necessarily be directly or indirectly related to our financial performance.

3. Political instability or changes in the Government or Government policies could impact the liberalization of the Indian economy and adversely affect economic conditions in India generally.

The performance and growth of our Company is dependent on the health of the Indian economy and more generally the global economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well. As a result, our business and the market price and liquidity of the Equity Shares may be affected by such economic and / or political changes. While the current Government is expected to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no absolute assurance that such policies will be continued. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and specifically have an adverse effect on the operations of our Company.

4. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect our business, prospects, results of operations and financial condition.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade as well as the worldwide financial markets. The Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighbouring countries which may persist and occur in the future. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the World, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

5. Natural disasters and other disruptions could adversely affect the Indian economy and could cause our business and operations to suffer and the trading price of our Equity Shares to decrease.

Our operations, may be damaged or disrupted as a result of natural disasters such as earthquakes, floods, heavy rainfall, epidemics, tsunamis and cyclones and other events such as protests, riots and labour unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations which could adversely affect our reputation, our relationships with our customers, our senior management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our infrastructure. We may also be liable to our customers for disruption in supply resulting from such damage or destruction. Our insurance coverage for such liability may not be sufficient. Any of the above factors may adversely affect our business, our financial results and the price of our Equity Shares.

6. Any future issuance of the Equity Shares may dilute your future shareholding and sales of the Equity Shares by the Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

Any future equity issuances by our Company may lead to dilution of your future shareholding in our Company. Any future equity issuances by our Company or sales of the Equity Shares by the Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Share. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Share. Except as otherwise stated in the Letter of Offer, there is no restriction on our Company's ability to issue the Securities or the relevant shareholders' ability to dispose of their Equity Share, and there can be no assurance that our Company will not issue Equity Share or that any such shareholder (including Promoters and Promoter Group) will not dispose of, encumber, or pledge its Securities.

7. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the 'automatic route', where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the 'government route', where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise way such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ('FDI') and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) ('DPIIT'), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 ('**FDI Circular 2020**'), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company fall under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI (SAST) Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e., any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid to make any investment in the Issue.

The Registrar to the Issue and our Company will not be responsible for any allotments made by relying on such approvals. Please also note that pursuant to Circular no. 14 dated September 16, 2003, issued by RBI, Overseas Corporate Bodies ('OCBs') have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument)

Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors. Our Company and the Registrar are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Draft Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
